News for the Week of October 6, 2014

Ready to transfer? Careful planning is key!

By: Kelli Adams, Transfer Coordinator

Planning to transfer to a four-year college or university is a process that begins long before the application deadline. Even in your first year of college, you can begin planning for your major by exploring what academic subjects you enjoy, volunteering, finding internships, and conducting informational interviews with professionals in the careers you are considering. In your second year, if you are over 45 credits, and you are planning to transfer within that year, it’s time to get down to business!

The timeline below will give you an idea of the many components necessary to get your application ready. It is based on a model where the student is looking to start at his or her four-year institution in the following fall. Pick up your copy in the transfer center! Be sure to check with each college to which you are applying for the specific application dates and deadlines – they are all different!
