CHE121, Spring 2011
General homework policies

• Show all your work for any calculations as clearly as possible in order to receive full credit.

• *All assignments are due at the beginning of class.* If you are going to be more than a couple minutes late on the day an assignment is due, please let me know.

• Work on each HW assignment far in advance of when it is due. I will answer questions about the assignment during lecture in the class meeting that comes *before* the due date.

• Please staple all pages together.

• You may work with other students or tutors on the problems, but the work you turn in must be your own.

• HW solutions will be posted on the course website each week by Wednesday at 4:00.

• Consider making a photocopy of your own HW before turning it in so that you can review your answers. Every week, the quiz on Thursday or Friday will cover the HW you turned in earlier in the week. The homework assignment and the accompanying “suggested extra practice problems” are the best materials to prepare for quizzes and exams!

• Each assignment is similar to ones I’ve assigned in the past two quarters; however, there will be several important but subtle differences. If it appears that you have turned in work that comes from a student who has taken this course previously, you will not earn credit for the assignment.
