Complete All Your Math in Three Quarters!

What is Statway™?
Statway™ is a 3-quarter sequence of classes that earns you credit for a college level (QSR) statistics course. It does so more quickly than the traditional algebra pathway and is real-world based. You will take courses over three quarters with the same students and the same instructor.

Is Statway™ for you?
If you are a liberal arts or humanities major, Statway™ may be a good choice for you! Statway™ is not designed for majors in Science, Technology, Engineering or Math (STEM), or business majors. As a general rule, Statway™ is a good option for any program that requires a college level statistics class and no other math. Programs that require Calculus or Pre-Calculus will not accept Statway™ as equivalent.

Prerequisites:
• Math 081 or equivalent
• Be reasonably sure you want to pursue a non-STEM major
• Commit to the full 3-quarter sequence
